

ERO-TEX

THE GROUND CONTROL LEADERS

Sediment Control Fence

ERO-TEX silt fence can reduce sediment loading into our creeks, streams and lakes from your construction sites and roadway projects.

With new N.P.D.E.S. regulations in place, retaining sediment on your site is now more critical than ever.

ERO-TEX silt fence is prefabricated for ease of installation and offers an effective sediment control solution for many applications.

Warehouse Locations:

Itasca IL

Little Chute WI

Morton IL

Menomonee Falls WI

Wisconsin Rapids WI

Options: I-DOT, WI DOT, Tollway, wire backed, face lathe, economy grade, monofilament fabric

Installation: Dig a 6" deep trench along proposed fence line. Unroll prefabricated silt fence and pound stakes into trench 6"-8". Make sure stakes are installed on the downhill or downstream side of fence. Drape loose end of textile into trench. Backfill and compact soil on both sides.
